

PATENTED PRODUCT developed in partnership with occupational therapists

Small overthickness 5 mm = good fluidity

PURPOSE

Universal and nomadic armrest for all types of tables, whose main function is to provide a posture correction.

FEATURES

- 1 JUMBOREST is composed of: 1 tablet + 1 multi-positions arm + 1 adjusting pad + 1 instructions for use
- Components sizes:
 - **Tablet:** big width 290 mm x small width 160 mm x length 280 mm
 - **Arm:** table aprons \leq 100 mm / offset of the adjusting pad under the table = 180 mm
- Materials: injected techno-polymer with high mechanical properties, for a high resistance to shocks and compliance with hygiene rules.

ASSEMBLY

- Overcenter held.
- The arm allows 3 assembly positions to provide a compatibility with wheelchairs with armrests.
- An adjusting pad by screw (set at the end of the arm) provides the compatibility with tables with different thicknesses (from 20 to 40mm).
- Lockout option of the JUMBOREST on the table available on request.

ADVANTAGES

- Simply overcenter held = very quick installation and high stability
- The multi-positions arm is removable by simple clip (without tool) to make easier its handling and transport in order to use it everywhere (institute, house, restaurant, computer station...).
- The use of 2 JUMBOREST replaces costly tables with notches.
- Compatible with all types of tables (thick tabletops, round square, tabletops with aprons, overbed tables...)
- The surfaces in contact with the table are skid-resistant and washable.
- Small overthickness ensuring a good fluidity of movement.
